

Air Quality Monitoring and Optimization Solutions

For Healthy Buildings and Workplaces

Empowering workplace leaders and healthy building teams to create world-class buildings and spaces that are smart, healthy, and sustainable

Healthy Workplaces

Leverage Kaiterra's air quality analytics and optimization solutions to deliver elevated workplace experiences that engage the workforce, retain talent, boost health, and increase productivity.

High Performance Buildings

Make data-driven decisions in building design and operations with real-time air quality data and insights. Deliver smart, innovative, healthy, and sustainable buildings.

Green Building Certifications

Meet air quality requirements and earn up to 9 points in WELL certification. Plus, achieve compliance with LEED, Fitwel, RESET, and UL Verified Healthy Buildings, with the potential to contribute points within each certification.

SENSEEDGE MINI FOR OUTDOORS

WIRELESS

SENSEEDGE GO

Sensedge Go

**Wireless indoor air quality monitor with up to 14 parameters.
Install in seconds, with up to 8 years of battery life.**

Perfect for retrofit projects or large deployment.

Features

Peel-and-stick installation

Up to 8 year of battery life*

Modular design

Ultra-long-range gateway

Cellular & Ethernet supported

BACnet supported

Works with WELL

RESET certified

* Using Kaiterra's patent-pending Adaptive Sampling™ technology.

HARDWARE

Sensedge Go is Available in 3 Models

	SE-300W	SE-300A	SE-300L
	Sensedge Go for WELL	Sensedge Go	Sensedge Go Core
	Made for WELL projects to earn 9 points and replace performance testing for Air & Thermal Comfort	Best for commercial buildings and workplace wellbeing projects	Great for increasing monitoring coverage and data density

Sensedge Mini

Minimal design with advanced cloud analytics and BMS integration in one solution. Works with WELL and BTL certified.

Perfect for new build projects.

Features

 Minimal, unobtrusive design	 ModBus supported
 Modular design	 BACnet supported, with BTL certification*
 Wi-Fi	 Works with WELL
 Ethernet	 RESET certified
 Local & cloud MQTT	

* The Sensedge Mini is BTL certified under the BACnet Smart Sensor (B-SS) device profile.

Sensedge Mini for Outdoors

(SE-201 & SE-201P)

An all-weather solution for outdoor air quality monitoring.

Features

 Minimal, unobtrusive design	 Local & cloud MQTT
 Modular design	 ModBus supported
 Wi-Fi	 BACnet supported, with BTL certification
 Ethernet	 Works with WELL

Parameters

 PM _{2.5} (KM-200)	 Temperature
 PM ₁₀ (KM-200)	 Humidity
 CO ₂	

Sensedge (SE-100)

Premium indoor air quality monitor with a stunning display. Perfect for displaying air quality and engaging with occupants.

Features

 7" full color touchscreen	 Ethernet
 Modular design	 Local & cloud MQTT
 8GB onboard memory	 ModBus supported
 Up to 8 hours of battery life for backup	 BACnet supported
 Wi-Fi	 Works with WELL
	 RESET certified

Parameters

 PM _{2.5} (KM-100)	 TVOC (KM-103)
 PM ₁₀ (KM-100)	 Temperature (KM-103)
 CO ₂	 Humidity (KM-103)

Kaiterra Data Platform

Manage, compare, analyze, report, and automate all in one place.

Creating a healthy, optimized indoor environment goes beyond collecting data, it requires clear insights and actionable strategies.

The Kaiterra Data Platform helps you turn IAQ data into impactful improvements across all of the spaces you manage.

Built on years of experience helping workplaces, real estate leaders, and healthy building advocates, our Data Platform goes beyond simple data visualization. This robust platform combines real-time IAQ data with advanced analytics and out-of-the-box reporting to help you stay informed and take action, whether you're managing a single site or overseeing a global portfolio.

The most powerful air quality data platform, built by IAQ experts.

Strategic

Track & Benchmark

Assess at a high level and track progress via KPIs

- ✓ Portfolio Report
- ✓ Time within Target
- ✓ WELL Compliance

Operational

Monitor & Report

View live data and trends to report compliance and issues

- ✓ Live data
- ✓ Alerts
- ✓ Kiosk View
- ✓ Trend report

Analytical

Troubleshoot & Discover

Dive deep into problematic areas and explore optimization

- ✓ Space vs. Time
- ✓ Under-ventilated
- ✓ Spaces
- ✓ Space utilization

Services

A team that truly knows IAQ inside and out to help you create real impact.

At Kaiterra, we consider ourselves 'certified air nerds'. We use our collective expertise and team of experienced professionals to help our clients drive change. We continuously invest in building our knowledge base and maintain strong relationships with several key organizations in the field, including WELL,

RESET, USGBC, and AIA. By staying up-to-date with the latest research and best practices, we are able to provide our clients with cutting-edge solutions and recommendations that positively impact their air quality.

Kaiterra provides support throughout your entire IAQ project, helping you make the most out of your air quality data and drive tangible outcomes.

- ✓ Dedicated Customer Success Manager (WELL Accredited Professionals)
- ✓ Initial onboarding and regular training support
- ✓ Sensor mapping and floor plan review
- ✓ Remote installation and deployment support
- ✓ Data validation and calibration support
- ✓ Quarterly Air Quality Performance Reviews
- ✓ Air quality and healthy building certification consulting

Placement Guidelines

INDOORS

When deciding where to position air quality monitors, it is important to prioritize representativeness. This means that the readings from the devices should accurately reflect the air quality that people are exposed to. Achieving this goal requires careful consideration of factors such as the height, relative placement, and density of the monitors.

- ✓ Wall-mounted and centrally located within monitored spaces
- ✓ Mounted within the breathing zone: between 3 to 6 feet (900-1800 mm) from the ground
- ✓ Located at least 5 meters (16 feet) away from operable windows, as well as air filters and fresh-air diffusers

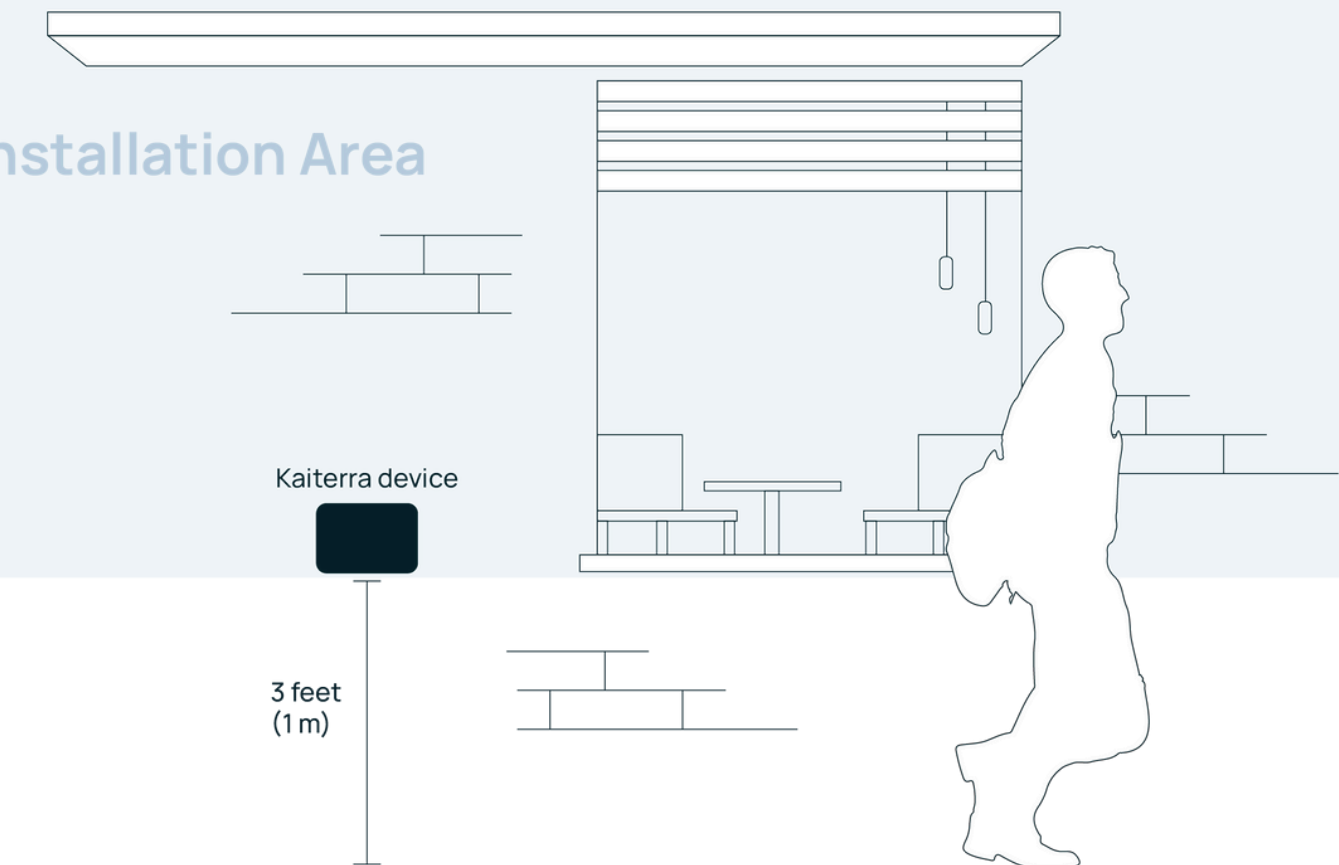

OUTDOORS

When positioning outdoor monitors, it's crucial to consider locations that accurately represent the overall air quality in a given area. Install monitors in open locations and away from obstructions that can influence airflow patterns and pollutant diffusion. Ensure monitors are positioned at a sufficient height and avoid locations that are prone to flooding.

- ✓ In a covered area away from direct sunlight
- ✓ Vertically upright with the opening facing downward
- ✓ Located at least 3ft (900mm) above ground level
- ✓ Close to a power source and power supply that will not be submerged in water
- ✓ To ensure optimal performance, keep the installation site and opening free from debris, insects, or spider webs that may accumulate and obstruct airflow

Installation Area

Monitoring and Improving IAQ With Kaiterra

Loved By All Teams

Workplace Leaders

- ✓ Improve employee health and well-being
- ✓ Enhance workplace experience and performance
- ✓ Make informed decisions on workplace design and occupancy planning

WELL APs and Sustainability Consultants

- ✓ Meet all the air quality requirements in WELL
- ✓ Comply with LEED, RESET, Fitwel
- ✓ Real-time compliance report to identify risks
- ✓ One-click export and submission for WELL data reporting

Real Estate Professionals

- ✓ Easily assess IAQ across your real estate portfolio and identify areas of improvement
- ✓ Improve occupant health and wellbeing
- ✓ Make informed decisions on real estate planning
- ✓ Improve real estate asset value in the longterm

Facilities & Operations

- ✓ Stay on top of IAQ within your facilities
- ✓ Identify issues faster and reduce occupant complaints
- ✓ Reduce time spent on analyzing or reporting on IAQ Minimal maintenance work

We collaborated with Kaiterra to help improve IAQ in the built environment. Connecting Kaiterra sensors to Johnson Controls Metasys or OpenBlue, has proven to improve performance, reduce COVID risk, and optimize energy.

Bernard Clement
Product Management, Healthy Building
Johnson Controls

Our employees are our greatest asset, so we wanted to design a space that was comfortable, inviting, and most importantly, safe to return to. With the air quality data provided by our Sensedges, we were able to be transparent about the air quality while also being able to apply these findings to the WELL certification process.
